## Y-USA Nationwide Membership Uploads

As you are probably aware, Y-USA is launching their Nationwide Membership program at the end August. CCC has been working with Y-USA since March to develop and test the upload process for CCCTIME users and several CCC Associations have been part of the pilot.

Once the Data Release has been signed and returned to Y-USA, there is no further action required from Associations on 16.6 release. As of August 7, systems are being set up in the order the agreements are submitted. CCC will send the necessary components and set up the scheduled tasks to generate the Membership, Visit and Image uploads on a nightly basis. If you are not on 16.6, please contact Terri to schedule the upgrade.

All gate activity for the current day will be included in the Membership Usage CSV. Any member pictures created or modified each day will be sent. All master records with a Membership Type assigned will be included in the Membership CSV, regardless of their current status. For Membership Types that are not eligible for Reciprocity, there is a new flag on Membership Type set-up to uncheck. Please review your membership type codes and update as needed.
