

The Right People. | The Right Answers.

New 'Online Silver Sneaker Check in' Application

This webpage runs on CCC's WebTIME® platform and is mobile friendly. It is designed to allow Silver Sneaker members to check in and record a visit.

The application is being offered for use at no charge to all CCC customers.

It is designed to be run across all CCC's customer base including YMCAs, YWCAs and JCCs. As such, there are no specific logos, color palettes, or patterning.

The image shows two side-by-side screenshots of a mobile application interface. The left screenshot is the input screen, and the right screenshot is the confirmation screen.

Left Screenshot (Input Screen):

- Header: Your Association Name membership@you.org
- Text: Please enter your Silver Sneaker ID
- Input field:
- Text: --OR--
- Text: Enter your association bar code number
- Input field:
- Button: Check in my visit

Right Screenshot (Confirmation Screen):

- Header: Your Association Name membership@you.org
- Text: Connor Guy, thank you for checking in today!

Process:

Customer will create a button or link on your static page to link to the URL for Silver Sneaker check in. On the page, member will enter EITHER their Silver Sneaker ID# or the Bar Code# from their membership card (which could be the FTID# or Mag Card#). Silver Sneaker ID# will be validated in CCCTIME® against the Alternate ID# field. Bar

The Right People. | The Right Answers.

Code# will be validated against FTID# if 6 chrs or less, or against Mag Card # if 7 or 8 chrs.

There are no other validation checks such as membership type or status, group affiliation or access restrictions. Upon locating a match, the system will record a gate visit entry for gate name WEBSIT. As this is not an actual visit, gate statistics will not be updated with the visit. The application will allow only one visit per day. All visits will be recorded in the main web branch.

Requirements:

A new index on the master record is required for this processing. Addition of the index must take place with all users out of OpTIME® and FundTIME®.

The association MUST be running either CCC's WebTIME® or CCC's WebTIME® API. For CCC customers running CCC's WebTIME® there are no changes needed.

For CCC customers running CCC's WebTIME® API's, there is no API work required. This APP will run on your current API server. Association will need to ensure the server is available to PUBLIC IP addresses to allow this application to run.
